## Insurance Report

## Whole vehicle theft losses <br> 2020-22 passenger cars, pickups, SUVs, and vans

WT-22 April 2023

## Highlights

The 2020-22 model year passenger vehicles combined had a whole vehicle theft claim frequency of 0.41 claims per 1,000 insured vehicle years. The average loss payment per whole vehicle theft (claim severity) was $\$ 45,068$. That translates to an average loss payment per insured vehicle year (overall losses) of $\$ 18$.

The Dodge Charger SRT Hellcat, a large four-door car, had the highest relative whole vehicle theft claim frequency at over 60 times the all-passenger-vehicle average. The Tesla Model 3 electric four-door 4WD, a midsize luxury car, and the Tesla Model Y electric four-door 4WD, a midsize luxury SUV, had the lowest relative whole vehicle theft claim frequencies at just 3 percent of the all-passenger-vehicle average.

## Introduction

Theft claims under comprehensive coverage in the Highway Loss Data Institute (HLDI) database can result from three different types of thefts: theft of contents from a vehicle, theft of vehicle parts, and theft of the entire vehicle. Most companies do not supply data to HLDI about the type of theft. Using the methodology defined in the Appendix, vehicle age and price were used to classify total theft losses.

The purpose of the current analysis is to quantify the extent to which whole vehicle theft varies by vehicle size/class and make/series. This report is an update of previous HLDI reports. It presents whole vehicle theft losses under comprehensive coverage for passenger vehicles produced during model years 2020-22. Vehicles in this report were up to 4 years old during the period studied.

Results for all 2020-22 vehicles are included in the overall totals and in the separate totals for class and size subgroups in the principal table (Table 4). A detailed description of these class and size subgroups appears in the HLDI Technical Appendix (2010). Only vehicles with 20,000 insured vehicle years of exposure or 100 claims are included. A total of 308 passenger car, pickup, SUV, and van series met one or both of these reporting criteria.

Results in this report were standardized to control for the effect of demographic and geographic variables to accurately assess the contribution of the vehicle to insurance losses. Losses were standardized by calendar year; model year; garaging state; number of registered vehicles per square mile (vehicle density); deductible; risk; and driver age, gender, and marital status. Standardization was accomplished using a two-step process. First, regression models were constructed to produce estimates for each variable for claim frequency, claim severity, and overall losses. Then, the estimates were reweighted so that every vehicle has the same exposure distribution across all of the variables in the model.

This standardization procedure was first described in HLDI special report A-77, Make and Series Results and Modeling (2008). Further modifications were described in special report A-82, Collision Losses After All-Variable Standardization (2009). For details about this procedure, see HLDI Loss Data Computation Methods (2018).

## - Whole vehicle theft losses by vehicle type

Table 1 lists whole vehicle theft losses for 2020-22 passenger vehicles by vehicle type after all-variable standardization. The 2020-22 model year passenger vehicles combined had a whole vehicle theft claim frequency of 0.41 claims per 1,000 insured vehicle years. The average loss payment per whole vehicle theft (claim severity) was $\$ 45,068$. As a result, the average loss payment per insured vehicle year (overall losses) was $\$ 18$. Passenger cars had the highest whole vehicle theft claim frequency ( 0.55 ), while pickups had the highest claim severity ( $\$ 61,071$ ) and overall losses ( $\$ 29$ ).

Table 1: Whole vehicle theft losses for 2020-22 model years by vehicle type after all-variable standardization

| Vehicle type | Claim frequency | Claim severity | Overall loss |
| :--- | :---: | :---: | :---: |
| Passenger cars | 0.55 | $\$ 37,085$ | $\$ 21$ |
| Pickups | 0.47 | $\$ 61,071$ | $\$ 29$ |
| SUVs | 0.32 | $\$ 45,264$ | $\$ 15$ |
| All passenger vehicles* | $\mathbf{0 . 4 1}$ | $\$ 45,068$ | $\$ 18$ |

*All-passenger-vehicle total includes 38,758 years of exposure and 13 claims from vans.

## Whole vehicle theft losses by class and size

Figures 1-3 show relative whole vehicle theft claim frequencies, claim severities, and overall losses by vehicle class and size for 2020-22 models. In each figure, the value 100 represents the average result for all passenger vehicles.

Relative claim frequencies ranged from 17 for midsize station wagons to 889 for large two-door cars, a category that includes only variants of the Dodge Challenger. Large four-door cars had the second-highest relative whole vehicle theft claim frequency (774) (Figure 1). Relative claim severities ranged from 40 for four-door microcars, a category that only includes the Mitsubishi Mirage, to 286 for very large luxury cars (Figure 2). Relative overall losses ranged from 13 for midsize station wagons to 1,131 for large two-door cars (Figure 3). Small sports cars, small luxury cars, and large vans did not have enough exposure to produce credible results.

Figure 1: Relative whole vehicle theft claim frequencies by class and size, 2020-22 model years

Figure 2: Relative whole vehicle theft claim severities by class and size, 2020-22 model years

Figure 3: Relative whole vehicle theft overall losses
by class and size, 2020-22 model years

## Lowest and highest whole vehicle theft losses

Table 2 lists the 20 vehicle series with the highest relative claim frequencies for whole vehicle theft. Many of the vehicles included on this list are expensive or boast high horsepower. There are also four Kia vehicles on this list as a result of a viral trend that has encouraged thieves to target the brand. The Dodge Charger SRT Hellcat, a large fourdoor car, had the worst result $(6,128)$. Seventeen of the twenty vehicle series with the worst theft claim frequencies had overall losses that were more than twice the all-passenger-vehicle average.

Table 2: Highest whole vehicle theft claim frequencies, 2020-22 model years

|  | Model years | Exposure <br> (insured <br> vehicle years) | Claims | Relative <br> claim frequency | Relative <br> claim severity | Relative <br> overall losses |  |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Dodge | Charger SRT Hellcat | $20-22$ | 7,826 | 196 | 6,128 | 197 | 12,073 |
| Dodge | Charger HEMI | $20-22$ | 79,139 | 712 | 2,197 | 115 | 2,523 |
| Infiniti | Q50 4dr | $20-22$ | 24,970 | 90 | 878 | 92 | 805 |
| Dodge | Challenger | $20-22$ | 119,461 | 375 | 766 | 107 | 822 |
| Land Rover | Range Rover 4dr 4WD | $20-22$ | 44,436 | 111 | 611 | 254 | 1,551 |
| Kia | Sportage 4dr | $20-22$ | 197,281 | 387 | 479 | 58 | 279 |
| Land Rover | Range Rover Sport 4dr | 4WD | $20-22$ | 78,574 | 148 | 460 | 211 |
| Kia | Sportage 4dr 4WD | $20-22$ | 217,834 | 370 | 415 | 61 | 971 |
| Honda | CR-V 4dr 4WD | $20-22$ | 681,118 | 1,141 | 409 | 76 | 255 |
| BMW | X6 4dr 4WD | $20-22$ | 22,124 | 33 | 361 | 191 | 6812 |
| Kia | Rio | $20-22$ | 78,233 | 115 | 359 | 43 | 155 |
| Kia | Forte | $20-22$ | 341,001 | 499 | 357 | 49 | 174 |
| Ford | F-350 SuperCrew 4WD | $20-22$ | 115,324 | 165 | 349 | 189 | 659 |
| BMW | X7 4dr 4WD | $20-22$ | 85,382 | 118 | 338 | 192 | 649 |
| Ford | F-250 SuperCrew 4WD | $20-22$ | 226,836 | 313 | 337 | 176 | 592 |
| Honda | Accord | $20-22$ | 613,914 | 771 | 306 | 69 | 211 |
| Ram | 3500 crew cab LWB 4WD | $20-22$ | 65,599 | 82 | 306 | 155 | 474 |
| Infiniti | Q50 4dr 4WD | $20-22$ | 23,108 | 27 | 287 | 99 | 285 |
| Nissan | Maxima | $20-22$ | 49,447 | 58 | 284 | 82 | 234 |
| Honda | CR-V 4dr | $20-22$ | 307,809 | 341 | 270 | 70 | 188 |

Table 3 lists the 20 vehicle series with the lowest relative claim frequencies for whole vehicle theft. Six of the 20 vehicles are made by GM, and an additional 6 are electric ( 5 of which are manufacturered by Tesla). The Tesla Model 3 electric four-door 4WD, a midsize luxury car, and the Tesla Model Y electric four-door 4WD, a midsize luxury SUV, headed the list with relative claim frequencies of 3 . All of the vehicles with the best results had whole vehicle theft claim frequencies that were less than a quarter of the all-passenger-vehicle average. Relative overall losses were also less than a quarter of the all-passenger-vehicle average for almost all the vehicles on this list.

Table 3: Lowest whole vehicle theft claim frequencies, 2020-22 model years

| Make | Series | Model years | Exposure (insured vehicle years) | Claims | Relative claim frequency | Relative severity | Relative overall losses |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tesla | Model 3 electric 4dr 4WD | 20-22 | 255,929 | 3 | 3 | 136 | 4 |

## Vehicle series whole vehicle theft losses

Detailed whole vehicle theft results for all 2020-22 passenger vehicles with at least 20,000 insured vehicle years of exposure or 100 paid whole vehicle theft claims are listed in Table 4. The values reported are total exposure (insured vehicle years), number of claims, and relative results for three loss categories: claim frequency, claim severity, and overall losses. The value 100 corresponds to the average result for all passenger vehicles in each loss category. Individual series are listed in ascending order of relative overall losses within each size and class group.

The total exposure accumulated for the three model years was nearly 13 million insured vehicle years for passenger cars and nearly 33 million insured vehicle years for pickups, SUVs, and vans. Whole vehicle theft claims numbered over 7,000 for passenger cars and more than 11,000 for pickups, SUVs, and vans.

Table 4: Whole vehicle theft losses by series, 2020-22 model years

| Make | Series | Model years | Exposure (insured vehicle years) | Claims | Relative claim frequency | Relative claim severity | Relative overall losses |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| All passenger vehicles |  | 20-22 | 45,394,030 | 18,596 | $100=0.41$ | $100=\$ 45,068$ | 100=\$18 |

## Appendix - methodology

Comprehensive coverage pays for financial losses associated with any of the three types of theft claims: theft of contents from a vehicle, theft of vehicle parts, and theft of the entire vehicle. Presumably, the cost of a claim for theft of vehicle contents and/or personal valuables in a vehicle should be less than the value of the vehicle, while the theft of an entire vehicle should result in a claim that is near the residual value of the vehicle. Therefore, any theft claim that is near the residual value of the vehicle is likely to be a whole vehicle theft.

Under collision coverage, a vehicle is declared a total loss when crash damage is so severe that the cost to repair the vehicle is higher than the vehicle's residual value. Insurers then take possession of the damaged vehicle and pay the insured the residual value of the vehicle. Data on collision total loss claims are provided to HLDI. Under comprehensive coverage, when an insured vehicle is stolen, insurers pay the policyholder the residual value of the vehicle.

Therefore, it can be assumed that total loss payments under collision coverage are approximately equal to payments for whole vehicle theft under comprehensive coverage.

Collision claims data and information on vehicle base price were used to estimate vehicle residual values at the calendar year, model year, and make and series level. These estimates were then used as a whole vehicle theft threshold. If the payment associated with a theft claim was greater than the threshold value, then it was designated a whole vehicle theft.

Information on all collision claims for 2020-22 model year vehicles during calendar years 2019-22 was obtained, and each claim was categorized as a total loss or not a total loss. Information on vehicle base price for each vehicle was obtained, and a ratio of collision payment to vehicle base price was calculated. The relationship between the payment ratio and the likelihood that a claim resulted in a total loss was studied by comparing the percentage of total losses across different values of the payment ratio. For example, among claims with a payment ratio ranging from 0.35 to 0.36 , only about 1 percent resulted in a total loss; whereas, among claims with a payment ratio ranging from 0.78 to 0.79 , as much as 50 percent resulted in a total loss. A payment ratio of 0.85 was selected as a preliminary threshold amount. At this ratio, two thirds of collision claims resulted in a total loss. This ratio was selected based on the shape of the distribution curve to balance the proportions of false negatives and false positives. This curve is illustrated in Appendix Figure 1.

To further verify the validity of this threshold for theft claims, individual claim sizes for three popular vehicles were examined: the Chevrolet Silverado 1500 crew cab 4WD, Subaru Forester four-door 4WD with EyeSight, and Toyota Corolla. In general, claim size distributions are different for collision and theft claims. The amounts for collision claims are distributed more or less equally between claims of less than a thousand dollars and claims equalling the full price of the vehicle. For theft, losses tend to be minor (when some parts are stolen) or major (when the whole vehicle is stolen), so claims for amounts in the middle are infrequent. When the theft claim size distributions for those three vehicles were examined and base prices were taken into account, the threshold value of 0.85 fit into that "in-between" range. The theft claim size distributions for these three vehicles are illustrated in Appendix Figures 2-4.

Appendix Figure 2: Chevrolet Silverado 1500 crew cab 4WD theft claim size distribution

Appendix Figure 3: Subaru Forester four-door 4WD with EyeSight theft claim size distribution

Appendix Figure 4: Toyota Corolla theft claim size distribution

Vehicles depreciate significantly as they age. Consequently, individual thresholds were calculated for each of the possible vehicle ages in the analysis. The ages ranged from -1 to 2 . A negative vehicle age occurs when the model year is greater than the calendar year. Vehicles from a model year can be and often are sold in the calendar year preceding the model year. These thresholds were selected because two thirds of collision claims associated with the thresholds resulted in a total loss.

| Vehicle age | Threshold |
| :---: | :---: |
| -1 | 0.86 |
| 0 | 0.84 |
| 1 | 0.82 |
| 2 | 0.92 |

Appendix Figure 5 illustrates the collision total loss likelihood relative to claim payment amounts and vehicle base price by vehicle age. As the vehicle age increases, the total loss threshold decreases.

Appendix Figure 5: Collision total loss likelihood relative to claim payments and vehicle base price by vehicle age

After these age-level values were selected, theft claims were evaluated to determine if they were likely to be whole vehicle theft claims. For each claim, the payment amount was divided by the vehicle base price. If the resulting ratio was greater than the threshold value appropriate for the age of the vehicle, then the claim was considered a whole vehicle theft. All claims considered to be whole vehicle theft were combined with exposure data and run through HLDI's all-variable-standardization procedure. The end result was that claim frequencies decreased and claim severities increased for the vehicles with the highest theft losses. For example, the 2021-22 Hyundai Elantra has an overall theft claim frequency of 1.7, compared with a whole vehicle theft claim frequency of 0.4. Claim severity for this vehicle increased from $\$ 9,095$ for any type of theft to $\$ 24,787$ for whole vehicle theft.
